Wikibooks Stacks Departments

This is a list of departments, which are further subdivided into shelves on which which books can be found. Our twelve departments are: Computing, Engineering, Help, Humanities, Languages, Mathematics, Miscellaneous, Recreational activities, Science, Social sciences, Standard curricula, and Wikijunior; we also have a Cookbook.

Most departments have a top-level shelf shown under for general references, and then more-specific top-level shelves below that. Feel free to explore!

Department:Science

< Departments

Science

Books in this area deal with **science**: any systematic knowledge-base or prescriptive practice that is capable of resulting in a prediction or predictable type of outcome. Science is a continuing effort to discover and increase human knowledge and understanding through disciplined research. The methods of scientific research include the generation of hypotheses about how phenomena work, and experimentation that tests these hypotheses under controlled conditions. The results of this process enable better understanding of past events, and better ability to predict future events of the same kind as those that have been tested.

Subsections

- Shelf:Science (general references)
- Shelf:Health sciences
- Shelf:Life sciences
- Shelf:Physical sciences
- Shelf:Science study guides

Featured Books

- Acoustics
- Anatomy and Physiology of Animals
- Basic Physics of Nuclear Medicine
- Coaching Youth Middle Distance Runners
- Engineering Acoustics
- First Aid

Mathematics

Books in this area deal with **mathematics**: the study of quantity, structure, space, relation, change, and various topics of pattern, form and entity.

Subsections

- Shelf:Mathematics (general references)
- Shelf:Applied mathematics
- Shelf:Elementary arithmetic
- Shelf:K-12 mathematics
- Shelf:Mathematical collections
- Shelf:Mathematical references
- Shelf:Mathematics history
- Shelf:Mathematics study guides
- Shelf:Pure mathematics
- Shelf:University level mathematics books

Featured Books

- Formal Logic
- High School Mathematics Extensions
- Linear Algebra

Department:Humanities

< Departments

Humanities

Books in this area deal with the **humanities**: academic disciplines which study the human condition, using methods that are primarily analytic, critical, or speculative, as distinguished from the mainly empirical approaches of the natural and social sciences.

Subsections

- Shelf:Humanities (general references)
- Shelf:Fine arts
- Shelf:History
- Shelf:Law
- Shelf:Literature
- Shelf:Performing arts
- Shelf:Philosophy
- Shelf:Religion

Featured Books

- Acoustics

Department:Languages

< Departments

Languages

The books in this area deal with **languages**, in particular foreign language learning. The study of individual modern and classical languages forms the backbone of the modern study of the humanities, while the scientific study of language is known as linguistics and is a social science. Since many areas of the humanities such as literature, history, and philosophy are based on language, changes in language can have a profound effect on the other humanities.
